

# Rock Bugs

## Inside you will find:

A variety of different sized and shaped pebbles.  
Some small tubs of paint.  
A paintbrush.  
Some pictures of insects, for example, ladybird, bees.

## To Make/Play:

1. Discuss and describe with your child, what the different insects look like using the photos provided.
2. Discuss with your child what colours of paint are required for their chosen insect and the different patterns they can see.
3. Let your child choose whichever stone they would like to create their own rock bug.
4. You can also join pebbles together to make a long insect (for example, a caterpillar) or you can find and use leaves and twigs to make features like wings and legs.
