Health and wellbeing¹

Experiences and outcomes

Learning in health and wellbeing ensures that children and young people develop the knowledge and understanding, skills, capabilities and attributes which they need for mental, emotional, social and physical wellbeing now and in the future.

Each establishment, working with partners, should take a holistic approach to promoting health and wellbeing, one that takes account of the stage of growth, development and maturity of each individual, and the social and community context.

I can expect my learning environment to support me to:

- *develop my self-awareness, self-worth and respect for others*
- *meet challenges, manage change and build relationships*
- *experience personal achievement and build my resilience and confidence*
- *understand and develop my physical, mental and spiritual wellbeing and social skills*
- *understand how what I eat, how active I am and how decisions I make about my behaviour and relationships affect my physical and mental wellbeing*
- *participate in a wide range of activities which promote a healthy lifestyle*
- *understand that adults in my school community have a responsibility to look after me, listen to my concerns and involve others where necessary*
- *learn about where to find help and resources to inform choices*
- *assess and manage risk and understand the impact of risk-taking behaviour*
- *reflect on my strengths and skills to help me make informed choices when planning my next steps*
- *acknowledge diversity and understand that it is everyone's responsibility to challenge discrimination.*

¹Health and wellbeing experiences and outcomes which are the responsibility of all adults working together are shown in italics.

Because of the nature of development and learning in health and wellbeing, many of the experiences and outcomes are written to span two or more levels. They should be regularly revisited through a wide range of relevant and realistic learning experiences to ensure that every child and young person is progressing in his or her development and learning.

Mental, emotional, social and physical wellbeing

Mental, emotional, social and physical wellbeing are essential for successful learning.

The mental, emotional, social and physical wellbeing of everyone within a learning community should be positively developed by fostering a safe, caring, supportive, purposeful environment that enables the development of relationships based on mutual respect. The four aspects of wellbeing are inextricably linked and are only separated here for practical purposes.

Planning for choices and changes

Learners need to experience opportunities which are designed not only to raise their awareness of future choices but also raise their expectations and aspirations. They develop the skills for personal planning and making decisions in the context of curriculum, learning and achievement which will prepare them for next stages in life.

Learners should experience activities which enable them to develop the skills and attributes they will need if they are to achieve and sustain positive destinations beyond school. Demands and employment patterns are changing, so it is particularly important for all young people to develop high levels of skill and also an understanding of the world of work, training and lifelong learning so that they can embrace opportunities.

Physical education, physical activity and sport

Physical education

Physical education provides learners with a platform from which they can build physical competences, improve aspects of fitness, and develop personal and interpersonal skills and attributes. It enables learners to develop the concepts and skills necessary for participation in a wide range of physical activity, sport, dance and outdoor learning, and enhances their physical wellbeing in preparation for leading a fulfilling, active and healthy lifestyle.

They encounter a variety of practical learning experiences, including working on their own, with a partner and in small and large groups, and using small and large equipment and apparatus, both outdoors and indoors.

Learning in, through and about physical education is enhanced by participating on a regular basis in a wide range of purposeful, challenging, progressive and enjoyable physical activities with choice built in for all learners. The Scottish Government expects schools to continue to work towards the provision of at least two hours of good quality physical education for every child, every week.

Movement skills, competencies and concepts	I am learning to move my body well, exploring how to manage and control it and finding out how to use and share space. HWB 0-21a	I am discovering ways that I can link actions and skills to create movement patterns and sequences. This has motivated me to practise and improve my skills to develop control and flow. HWB 1-21a	As I encounter new challenges and contexts for learning, I am encouraged and supported to demonstrate my ability to select, adapt and apply movement skills and strategies, creatively, accurately and with control. HWB 2-21a / HWB 3-21a	As I encounter a variety of challenges and contexts for learning, I am encouraged and supported to demonstrate my ability to select and apply a wide range of complex movement skills and strategies, creatively, accurately and with consistency and control. HWB 4-21a	
	I am developing my movement skills through practice and energetic play. HWB 0-22a	I am developing skills and techniques and improving my level of performance and fitness. HWB 1-22a	I practise, consolidate and refine my skills to improve my performance. I am developing and sustaining my levels of fitness. HWB 2-22a / HWB 3-22a	I can organise my time to practise, consolidate and refine my skills to achieve my highest quality performance in a range of contexts. I am developing and sustaining my level of performance across all aspects of fitness. HWB 4-22a

Physical education, physical activity and sport (continued)

Physical activity and sport

In addition to planned physical education sessions, physical activity and sport take place in the classroom, in the school, during travel such as walking and cycling, in the outdoor environment and in the community. Learning in, through and about physical activity and sport is enhanced by participating in a wide range of purposeful and enjoyable physical pursuits at break times, lunchtimes, within and beyond the place of learning.

The experiences and outcomes are intended to establish a pattern of daily physical activity which, research has shown, is most likely to lead to sustained physical activity in adult life. Experiences and outcomes should also open up opportunities for learners to participate and perform at their highest level in sport and, if interested, pursue careers in the health and leisure industries.

Physical education, physical activity and sport (continued)

Physical activity and health

Learners develop an understanding of their physical health and the contribution made by participation in physical education, physical activity and sport to keeping them healthy and preparing them for life beyond school. They investigate the relationship between diet and physical activity and their role in the prevention of obesity.

The experiences and outcomes are intended to establish a pattern of daily physical activity which, research has shown, is most likely to lead to sustained physical activity in adult life. Physical activity and sport take place in addition to planned physical education sessions, at break times and lunchtimes in and beyond the place of learning.

Food and health

Learners develop their understanding of a healthy diet, which is one composed of a variety and balance of foods and drinks. They acquire knowledge and skills to make healthy food choices and help to establish lifelong healthy eating habits. They develop an appreciation that eating can be an enjoyable activity and understand the role of food within social and cultural contexts. They explore how the dietary needs of individuals and groups vary through life stages, for example during pregnancy and puberty, and the role of breastfeeding during infancy.

Learners develop knowledge and understanding of safe and hygienic practices and their importance to health and wellbeing and apply these in practical activities and everyday routines including good oral health. They develop awareness that food practices and choices depend on many factors including availability, sustainability, season, cost, religious beliefs, culture, peer pressure, advertising and the media.

	Early	First	Second	Third	Fourth
Nutrition	I enjoy eating a diversity of foods in a range of social situations.				
	HWB 0-29a / HWB 1-29a / HWB 2-29a / HWB 3-29a / HWB 4-29a				
	Together we enjoy handling, tasting, talking and learning about different foods, discovering ways in which eating and drinking may help us to grow and keep healthy. HWB 0-30a	By investigating the range of foods available I can discuss how they contribute to a healthy diet. HWB 1-30a I experience a sense of enjoyment and achievement when preparing simple healthy foods and drinks. HWB 1-30b	By applying my knowledge and understanding of current healthy eating advice I can contribute to a healthy eating plan. HWB 2-30a	By taking part in practical food activities and taking account of current healthy eating advice, I can prepare healthy foods to meet identified needs. HWB 3-30a	Having researched food and health policy, and dietary legislation, I can explain how this impacts on individuals, the community and the world of work. HWB 4-30a

Nutrition (continued)				Through practical activities using different foods and drinks, I can identify key nutrients, their sources and functions, and demonstrate the links between energy, nutrients and health. HWB 3-31a	I can apply my knowledge and understanding of nutrition, current healthy eating advice and the needs of different groups in the community when planning, choosing, cooking and evaluating dishes. HWB 4-31a
	I know that people need different kinds of food to keep them healthy. HWB 0-32a	I am beginning to understand that nutritional needs change at different stages of life, for example the role of breastfeeding in infant nutrition. HWB 1-32a	I understand that people at different life stages have differing nutritional needs and that some people may eat or avoid certain foods. HWB 2-32a	I am developing my understanding of the nutritional needs of people who have different conditions and requirements. HWB 3-32a	Having identified diet-related conditions, I can adapt and cook recipes to suit individual needs. HWB 4-32a Having assessed how lifestyle or life stages can impact on people's nutritional needs, I can explain how these needs are met. HWB 4-32b
Safe and hygienic practices	I am becoming aware of how cleanliness, hygiene and safety can affect health and wellbeing and I apply this knowledge in my everyday routines such as taking care of my teeth. HWB 0-33a / HWB 1-33a		Having learned about cleanliness, hygiene and safety, I can apply these principles to my everyday routines, understanding their importance to health and wellbeing. HWB 2-33a	I can apply food safety principles when buying, storing, preparing, cooking and consuming food. HWB 3-33a	Having explored the conditions for bacterial growth, I can use this knowledge to inform my practice and control food safety risks. HWB 4-33a

Food and the consumer			Through exploration and discussion, I can understand that food practices and preferences are influenced by factors such as food sources, finance, culture and religion. HWB 2-34a	Having explored a range of issues which may affect food choice, I can discuss how this could impact on the individual's health. HWB 3-34a / HWB 4-34a	
	I explore and discover where foods come from as I choose, prepare and taste different foods. HWB 0-35a	When preparing and cooking a variety of foods, I am becoming aware of the journeys which foods make from source to consumer, their seasonality, their local availability and their sustainability. HWB 1-35a / HWB 2-35a			Having investigated the effects of food processing on the nutritional value of foods, I can critically assess the place of processed foods in a healthy balanced diet. HWB 4-35a
			By investigating food labelling systems, I can begin to understand how to use them to make healthy food choices. HWB 2-36a	Using my knowledge of nutrition and current healthy eating advice, I can evaluate the information on food packaging, enabling me to make informed choices when preparing and cooking healthy dishes. HWB 3-36a	I have examined and evaluated food packaging and can understand the legal requirements for manufacturers. HWB 4-36a

Substance misuse

Learners develop their understanding of the use and misuse of a variety of substances including over the counter and prescribed medicines, alcohol, drugs, tobacco and solvents. They explore and develop their understanding of the impact of risk-taking behaviour on their life choices. The experiences and outcomes will enable learners to make informed personal choices with the aim of promoting healthy lifestyles.

Relationships, sexual health and parenthood

Learners develop an understanding of how to maintain positive relationships with a variety of people and are aware of how thoughts, feelings, attitudes, values and beliefs can influence decisions about relationships, and sexual health. They develop their understanding of the complex roles and responsibilities of being a parent or carer.

	Early	First	Second	Third	Fourth

Appendix – Explanations

These provide definitions of terms or advice on particular experiences and outcomes.

Introductory statements

Resilience

The development of resilience or coping skills is particularly important to young people as increasing numbers are struggling through school and life with social and emotional needs that greatly challenge schools and welfare agencies.

A resilient child can resist adversity, cope with uncertainty and recover more successfully from traumatic events or episodes.

Mental, emotional, social and physical wellbeing

Mental wellbeing

Mental wellbeing refers to the health of the mind, the way we think, perceive, reflect on and make sense of the world.

Mental health

The World Health Organisation describes mental health as:

‘a state of wellbeing in which the individual realises his or her own abilities, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to his or her community.’

Emotional wellbeing

Emotional wellbeing refers to recognising, understanding and effectively managing our feelings and emotions.

Social wellbeing

Social wellbeing refers to being and feeling secure in relationships with family, friends and community, having a sense of belonging and recognising and understanding our contribution in society.

Social wellbeing – HWB 0-12a, etc

This will be developed by raising the young person’s awareness, understanding and experience of participation in consultation, citizenship and volunteering activities within the formal and informal curriculum.

Self-esteem/Self-worth

Self-esteem is a self rating of how well the self is doing. It means:

- the way we feel about ourselves
- the way we feel about our abilities
- the value we place on ourselves as human beings.

Physical wellbeing

Physical wellbeing refers to the knowledge, skills and attitudes that we need to understand how physical factors affect our health.

Physical wellbeing – HWB 0-18a, etc

This applies to all kinds of travel – whether on foot, bicycle, motor vehicle or public transport. To support the reduction of road accidents, it is the responsibility of all adults to teach and encourage good road safety practice and to reinforce this by modelling appropriate behaviour.

Particular attention should be paid at times of transition, especially during the transition from primary to secondary school, where there is a significant increase in road traffic accidents.

Emotional literacy

Being ‘emotionally literate’ means having the ability to identify, understand and express emotions in a healthy way.

Physical education, physical activity and sport

Physical education

Movement skills, competences and concepts

There are two progressive pathways within this line of development. The first concentrates on using your body to perform and link increasingly complex actions and is about developing physical competences in learners which allow them to participate in physical activities. This forms part of the social inclusion agenda.

The second concentrates on the development of high quality performance in a range of contexts, and improving fitness.

Physical experiences and contexts for learning within these lines of development include: gymnastics, dance, water-based activity, directly/indirectly competitive activities and individual/team activities.

Cooperation and competition

The term physical event is deliberately wide as it allows practitioners to utilise a variety of opportunities to deliver the outcome, including, school and local authority competitions, come and try sessions, participation days, festivals and other organised activities.

Physical activity and sport

This line of development addresses the role that schools play in widening activity participation and performance pathways in Scottish sport. Its placement encourages participation and performance at the age most suited to the individual. This should help establish a behaviour pattern in sport which evidence has shown is a strong predictor of participation into adult life.

Moderate activity is that of sufficient intensity to raise the heart and respiration rate. It is characterised by being slightly out of breath and having a raised body temperature.

Vigorous activity is of an intensity to significantly raise the heart and respiration rate. It is characterised by being breathless and perspiring.

Relationships, sexual health and parenthood

HWB 0-47b / HWB 1-47b

While important to acknowledge that people use different words for parts of the body associated with sexuality and sexual reproduction, it is essential to introduce and use the proper anatomical terms as early as possible, taking account of cultural and faith perspectives. This provides an appropriate language for learning about relationships and sexual health in establishments and is helpful to professionals and others with a health, care and welfare role.
